

Prologo

Quando yo hice esta obra no me propuse hacer otra cosa, mas, que una reduccion de leguas a kilometros desde 1 hasta 1000 con todos sus divisores con el objeto de que me sirviera de estudio, en una cosa que siendo ~~de~~ para necesidad al saberlo.

Yademás sabiendo yo que hay mas obras de esta especie. (aunque yo no he visto ninguna) no deseo que se imprima por este motivo.
